Let's Start!

Talking About Software Agreements!

Learning Outcome:

Understand information about people's backgrounds in spoken or written documents.

Define strategies to make terms of reference and supplier assessment processes, in technology acquisition, based on established protocols.

Ask your partner:

- What is a software license agreement?
- Do you consider a software contract is necessary? Why? Why not?

Can Do Statements:

- I can discuss the limitations that are placed on the users of the software in a software license agreement.
- I can talk about the limitations that are placed on the purpose of the software in a software license agreement.
- I can talk about the limitations that are placed on specified servers or specific locations to use the software in a software license agreement.

Let's Explore!

Talking About Limitations in a Software License Agreement

Instructions: Read the text below.

Today, this lecture focuses on the limitations that are placed on a software license agreement. Before agreeing to any term, the customer should consider the key provisions of the agreement. One of them is the license scope. How can the possible limitations be placed on the use of the software? Limitations in software licenses include boundaries on many different aspects. For instance, who could the software be used by? Where can the software be used?

If it is utilized in a certain place or only by a certain server. Besides, by having access to a software, the number of users need to be specified, and you have to answer yourself: what can be the software used for? After analyzing these questions, the customer needs to guarantee that the license does not exclude the software usage in an outsourced environment, in case the customer outsources the IT infrastructure to do some activities in its IT environment. What limitations could be placed regarding servers or locations?

For instance, if the license is limited by the number of users, the customer should check if the license needs a permission to install the software on another server or obtain additional licenses. Also, if the access is via the web, it does not contravene limits on who can use the software. Besides, can the software be moved to a different machine by paying additional fees? This process has to be agreed up front idealistically, so the customer is not forced into paying additional charges to suit his needs. Finally, the purposes of the software need to be considered. There are some companies that prohibit certain usages or third parties involved.

Let's Practice!

This information is founded at a poster at a lecture.

Instructions: Use the words from the box to correctly complete the sentence.

be used anywhere / be placed / be excluded in
be outsourced to / be included

1. Could the software usage _____ an outsourced environment by the license?
2. If the access is via the web, can the software _____?
3. Can the IT infrastructure _____ do some activities in its IT environment?
4. Could different types of boundaries _____ in software licenses?
5. How can the possible limitations _____ on the use of the software?

Let's Practice!

An attendant to the lecture took note of the main questions regarding License Agreement Scope.

Instructions: Select the correct answer.

1. Who could the software _____?
a. be used by b. be used for c. be used d. be placed
2. Where can the software _____?
a. be move b. be used for c. be used d. be used by
3. What can the software _____?
a. be placed b. be used for c. be used by d. be moved
4. What limitations could _____ regarding servers or locations?
a. be placed b. be used c. be used for d. be used by
5. Can the software _____ to a different machine by paying additional fees?
a. be used b. be used by c. be moved d. be used for

Extension Activity

What are the most usual restrictions in Software License Agreements?

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Research more information about Software License Agreement.
- Make a list about the common restrictions, limitations, and boundaries it generally has.
- Prepare a presentation where you explain all this information.
- Use the grammar and vocabulary studied in class.
- Make your presentation in front of your classmates and teacher.
- Answer the questions your classmates and teacher may have.

Self-Assessment

	Yes	No
1. I look for more information about Software License Agreement.	☐	☐
2. I classify this information into restrictions, limitations, and boundaries.	☐	☐
3. I organize a presentation to explain these aspects.	☐	☐
4. I use the grammar and vocabulary I learned.	☐	☐
5. I give a presentation about Software License Agreement in front of my class.	☐	☐
6. I clear up my classmates and teacher's doubts.	☐	☐

Target Words

- **term** (noun): an agreement stipulated by an official entity.
e.g. Before agreeing to any term, the customer should consider the key provisions of the agreement.
- **boundary** (noun): something that shows a limit.
e.g. Limitations in software licenses include boundaries on many different aspects.
- **guarantee** (verb): to promise or stand behind an action.
e.g. The customer needs to guarantee that the license does not exclude the software usage in an outsourced environment.
- **outsourced** (adjective): something external from the work environment.
e.g. The customer needs to guarantee that the license does not exclude the software usage in an outsourced environment.
- **contravene** (verb): to act against the law.
e.g. It does not contravene limits on who can use the software.
- **up front** (expression): expression used to explain that something is done in advance.
e.g. This process has to be agreed up front idealistically.

Learning Points

The Passive of Modal Verbs, Can and Could in Questions

Can and **could** in **passive voice** are used in questions when you want to ask about possibilities in the past and in the present.

Passive voice is used when the agent of the sentence is not relevant or is unknown. Questions with can and could are used in passive voice to ask for present and past abilities or possibilities.

This is the grammatical structure that must be followed when using this tense:

Can/could + Subject + **Be** + **Past participle verb** + Complement + ?

Example:

Can the limitations of the software **be stipulated** for everybody?

*Could is not always used in past, it can also be used in present to ask about probability.

Examples

- *What can the possible limitations be placed on the use of the software?*
- *Who could the software be used by?*
- *Where can the software be used?*
- *What limitations could be placed regarding servers or locations?*

Verb + Ing After Prepositions

A **verb with -ing** or in gerund form is used **after a preposition** in a sentence.

There are different prepositions in English that denote time (for instance: after, before, to, until, since, etc.), location (for instance: behind, above, below, by, near, etc.), and movement (for example: against, down, from, towards, etc.). If a verb is mentioned after one of these prepositions, it must go with **-ing**.

Example:

After explaining all the software contract, you can proceed to use the license.

Examples

- *Before agreeing to any term, the customer should consider the key provisions of the agreement.*
- *By having access to a software, the number of users need to be specified.*
- *After analyzing these questions, the customer needs to guarantee that the license does not exclude the software.*
