Let's Start!

I want cloud computing for my company!

Learning Outcome:

Understand information about people's backgrounds in spoken or written documents.

Interpret the IT needs assessment, to determine the required technology to manage information, according to the rules and protocols established by the company.

Can Do Statements:

- I can say aspects a customer needs to consider to make cloud services work.
- I can talk about provisions to consider in case a cloud computing vendor fails in service.
- I can discuss improvements and enhancements for cloud services.

Ask your partner:

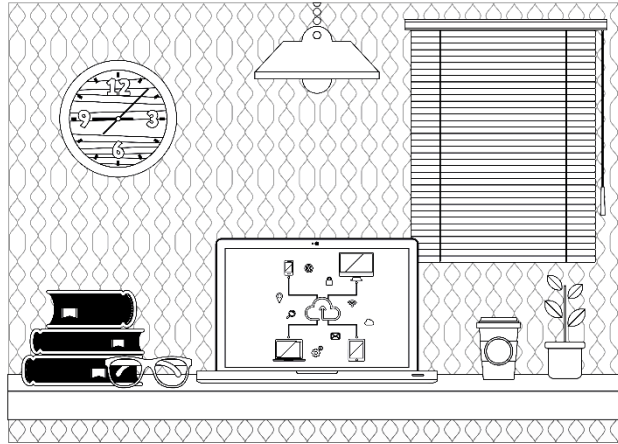

- What are some common concerns about cloud services?
- What are some agreements the vendor offers when getting cloud services?

Let's Explore!

Talking About Considerations to Make Cloud Services Work!

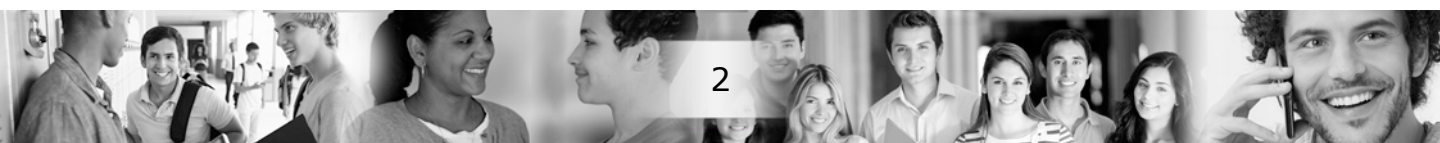

Instructions: Read the text below.

Companies must contemplate the different benefits that computing and pitfalls offer. In order to make cloud services work, customers should consider some facts. For instance, expert assistance has to be engaged by companies. When organizations call for expert consultants, they're more likely to feel satisfied with the products. Besides, due diligence has to be implemented for companies to go over the vendor's performance and history. The operating characteristics have to be taking into account as well; so that the company backs out of what the vendor has promised and that way, it could avoid expensive disputes. In the same way, the impact that the loss of critical computing functions can cause, it also needs to be considered.

This is essential because services might hamstring the customer's tasks. Similarly, vendors must provide support regarding any issue that may arise. During the process, companies need to show evidence of the service availability. Customers must also know about the cessation of services that can cause no-payment matters, in other words, invoices have to be paid to avoid the service termination. On the other hand, vendors stand for their companies and that's why they must understand the consequences of a vendor failure. If vendors back out of the agreement, customers don't need to put up with it in case they have more options.

Companies have to get involved in handling problems that come from the vendors. For example, if a customer loses access to his information, the company must maintain the back-up and recovery options. Besides, electronic copies have to be given in order to get the information back, and also to obtain access to the software. There are some improvements that cloud services come along with. For instance, the availability of improved software, better agreements between vendors and customers, among others. These agreements have to be discussed in advance to verify costs, benefits, and enhancements.

Let's Practice!

We need to be careful with some aspects about clouds services

Instructions: Organize the mystery sentence.

- Expert / to / has / assistance / engaged / companies. / by / be

- any / Support / be / arises. / vendors / by / to / issue / provided / has / if

- to / have / The / companies. / by / of / a / failure / understood / consequences / vendor / be

- operating / have / as / contemplated / characteristics / well. / The / be / to

Let's Practice!

Finding the missing words for the right support!

Instructions: Find the missing words for each sentence.

- The service availability has to be evidenced during the whole p_____s.
- The cessation of services for non-payment has to be known by c_____s.
- Invoices have to be paid to avoid the s_____e termination.
- Software developments have to be discussed in a_____e to verify costs.
- Companies have to be gotten i_____d to handle problems from the vendors and customers.

D	P	E	M	T	I	O	L	X	S
M	R	H	X	C	N	Q	O	J	E
O	O	A	N	N	V	N	O	T	R
Y	C	F	Q	Y	O	S	V	B	V
Y	E	X	P	P	L	W	M	S	I
F	S	K	A	L	V	Q	I	Z	C
H	S	W	U	U	E	U	C	A	E
Q	L	K	W	M	D	Q	B	G	D
V	C	U	S	T	O	M	E	R	S
A	D	V	A	N	C	E	I	B	I

Extension Activity

I look for disadvantages of cloud computing.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Search for information about disadvantages of cloud computing.
- Identify disadvantages applicable for me and my job.
- Design a brochure mentioning those disadvantages and some suggestions to solve them.
- Share your brochure with the class and discuss about it.

Self-Assessment

Yes

No

- I search for information about disadvantages of cloud computing. ☐ Yes ☐ No
- I identify disadvantages applicable for me and my job. ☐ Yes ☐ No
- I design a brochure mentioning those disadvantages and some suggestions to solve them. ☐ Yes ☐ No
- I share your brochure with the class and discuss about it. ☐ Yes ☐ No

Target Words

- **pitfall** (noun): an unexpected issue or problem.
e.g. Companies must contemplate the different benefits that computing and pitfalls offer.
- **engage** (verb): to put influence over someone to perform an activity.
e.g. For instance, expert assistance has to be engaged by companies.
- **due diligence** (noun): a term that involves investigation and research about something or someone in a company.
e.g. Besides, due diligence has to be implemented for companies to go over the vendor's performance and history.
- **hamstring** (verb): to frustrate or restrict a process.
e.g. This is essential because services might hamstring the customer's tasks.
- **cessation** (noun): a termination or stopping of a process.
e.g. Customers must also know about the cessation of services that can cause no-payment matters.

Learning Points

Passive of Modal Verbs: Have to

The **passive voice** with the modal verb **have to** refers to an obligation that goes upon the subject of the sentence.

When using the **passive voice** in English, represents a focus on the object of the sentence instead of the agent. By using the modal verb **have to** the sense of the sentence turns to an obligation or requirement. It means that something needs to be done compulsorily.

The grammatical structure for using the **passive voice** with **have to** is:

Subject + have/has + To Be + Past participle + Complement

For example:

*Documents **have to be checked** in detail.*

Examples

- *The cessation of services can cause no-payment matters, in other words, invoices **have to be paid** to avoid the service termination.*
- *For instance, expert assistance **has to be engaged** by companies.*
- *Electronic copies **have to be given** in order to get the information back, and also to obtain access to the software.*
- *Besides, due diligence **has to be implemented** for companies to go over the vendor's performance and history.*

Inseparable Phrasal Verbs: Put up with, Back out of

Inseparable phrasal verbs cannot have the object of the sentence in the middle of the phrasal verb, it must go after the preposition or adverb.

An **inseparable phrasal verb**, as its name says, cannot be separated. The verb plus the preposition have certain meaning by going together.

For instance, **put up with**. It means to tolerate or to accept a situation.

Example:

*Customers don't have to **put up with** vendor's failures.*

Back out of means to fail to keep a promise or an agreement.

Example:

*Sometimes vendors **back out of** the contract and companies need to interfere.*

Examples

- *The operating characteristics **have to be taking** into account as well; so that the company **backs out of** what the vendor has promised*
- *If vendors **back out of** the agreement, customers don't need to **put up with** it in case they have more options.*
- *If a customer loses access to his information, the company must maintain the **back-up** and recovery options.*
