Let's Start!

Cloud Computing for Companies!

Cloud Computing

Learning Outcome:

Understand information about people's backgrounds in spoken or written documents.

Interpret the IT needs assessment, to determine the required technology to manage information, according to the rules and protocols established by the company.

Can Do Statements:

- I can list some rules to consider when negotiating cloud contracts.
- I can talk about some characteristics for rules to consider when negotiating cloud contracts.
- I can discuss suitable contractual protections.

Ask your partner:

- What is cloud computing?
- What are some benefits of cloud computing for companies?

Let's Explore!

Analyzing the cloud contract rules!

Instructions: Read the text below.

- Daniel:** We should go over the cloud contracts today.
- Sasha:** As you already know, cloud computing could be implemented to distribute technology as a service on demand over the internet. This way, customers could be benefited from economies, and companies can decrease the costs of IT services.
- Daniel:** What are some rules to consider when negotiating cloud contracts?
- Sasha:** First, liability should be considered carefully.
- Daniel:** Because it's usual for suppliers to reject liability in case of data loss?
- Sasha:** Exactly! Besides, you got to look into the Intellectual Property Rights or IPR. The agreed positions should be reflected in the IP clause in the contract if this were the case.
- Daniel:** Hidden charges should be avoided as well. Right?
- Sasha:** Of course. Providers can get away with charging hidden fees. A termination of the contract could also be imposed.
- Daniel:** I guess we must be aware of the possibility of finishing the contract sooner than expected.
- Sasha:** Correct. Moreover, the governing law and jurisdiction should be checked in case an issue arises in the future.
- Daniel:** That's very convenient in case a party backs out of the deal.
- Sasha:** Finally, a grace period should be provided after the contract is expired to recover data and to delete it after the deal is terminated.
- Daniel:** That rule is called the lock-in and exit. What about the suitable contractual protections?
- Sasha:** When you choose a cloud supplier, you must look into the contractual and pricing documents in advance. You need to take into consideration if the suggested contract presents suitable protection measures in the case of data loss, as well.
- Daniel:** It's basically about ensuring the cloud contract is following every rule we have discussed.
- Sasha:** Yes! And, if you get the feeling something is not working, do not sign the agreement.

Let's Practice!

Things to consider when negotiating cloud contracts.

Instructions: Read the paragraph. Underline all the mistakes in the paragraph.

Today, we'll discuss the cloud contracts. Cloud computing have been implement to distribute technology as a service on demand over the internet. This way, customers could benefited from economies, and companies can decrease the costs of IT services. But, what are some rules to consider when negotiating cloud contracts? First of all, liability should been considered carefully; it's usual for suppliers to reject liability in the case of loss of data. Besides, you got to look into the Intellectual Property Rights or IPR. The agreed positions should be reflect in the IP clause in the contract. Hidden charges could be avoids as well.

Let's Practice!

Cloud contracts; What to Take Into Account.

Instructions: Write the words to correctly complete the sentences. Use words from the box below.

Read the sentences aloud. Check your pronunciation with your instructor.

could also be / charged / should / be considered / should be

1. The cloud contracts _____ be discussed today.
2. Remember that some rules must _____.
3. The agreed positions _____ reflected on the IP clause of the contract.
4. Providers could be _____ with hidden fees.
5. A termination of the contract _____ imposed.

Extension Activity

What can I find regarding Cloud Services?

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Find information about cloud services offered online.
- Take notes about the regulations regarding cloud service contracts.
- Prepare slides or posters and prepare and give a presentation to the class. Be ready to answer questions.

Self-Assessment

Yes

No

- I list some rules to consider when negotiating cloud contracts.
- I talk about some characteristics for rules to consider when negotiating cloud contracts.
- I discuss suitable contractual protections.

Target Words

- **supplier** (noun): someone in charge of distributing a service.
e.g. Because it's usual for suppliers to reject liability in the case of loss of data.
- **look into** (phrasal verb): to investigate something carefully.
e.g. When you choose a cloud supplier, you must look into the contractual and pricing documents in advance.
IPR.
- **back out of** (phrasal verb): to regret doing something and stop doing it.
e.g. That's very convenient, in case a party backs out of the deal.
- **go over** (verb): to examine something in detail.
e.g. We should go over the cloud contracts today.
- **cloud contract** (noun): a document that shows the part's agreement on giving access to programming and computer facilities online.
e.g. What are some rules to consider when negotiating cloud contracts?
- **liability** (noun): legal or financial responsibility.
e.g. First of all, liability should be considered carefully.

Learning Points

Passive of modal verbs, could and should.

When we want to give importance to the object of a sentence or when the subject is not important or unknown, the **passive voice** is used. The noun or noun phrase that is the object of an active sentence becomes the subject of the **passive** sentence.

The grammatical structure that is followed for the passive voice of modal verbs is:

Subject + Modal Verb + Be + Past participle + Complement

The passive voice is used with the modal verb **could** to talk about present or future possibility.

Active voice
Legal counselors could advise people.

Passive voice
People could be advised by legal counselors.

On the other hand, we use the modal verb **should** to give advice.

Active voice
All the companies should implement suitable contractual protections.

Passive voice
Suitable contractual protections should be implemented by all the companies.

Examples

- *Cloud computing could be implemented to distribute technology as a service on demand over the internet.*
- *This way, customers could be benefited from economies and companies can decrease the costs of IT services.*
- *Hidden charges should be avoided as well.*
- *The agreed positions should be reflected in the IP clause in the contract if this were the case.*
- *First of all, liability should be considered carefully.*

Learning Points

Inseparable Phrasal Verbs: Get Away With, Look Into

Inseparable phrasal verbs cannot introduce the object of the sentence between their verbs and their prepositions or adverbs.

When you use inseparable phrasal verbs, you must always place the *object* pronoun *after the preposition*. It is not grammatically correct to separate the phrasal verb to place the object of the sentence.

For instance, *get away with* means to manage to do something wrong without getting negative consequences. If we separate this phrasal verb, the sentence doesn't make sense:

*Suppliers broke the law and **got away with** it. (Correct)*

*Suppliers broke the law and **got it away with**. (Incorrect)*

The phrasal verb *look into*, which means *to investigate*, is another example of an inseparable phrasal verb:

*Companies must **look into** contractual protection benefits. (Correct)*

*Companies must **look** contractual protection benefits **into**. (Incorrect)*

Examples

- *Providers can get away with charging hidden fees.*
- *Besides, you got to look into the Intellectual Property Rights or IPR.*
